WORK EXPERIENCE

Amazon

Seattle, WA

SDE Intern

June 2025 – September 2025

- Designed and implemented a targeted notification campaign based on customer usage patterns for the “Shop With Points” team
- Integrated internal APIs and contributed new logic to existing production systems
- Developed a decision-making algorithm to optimize customer experience for the campaign
- Built an end-to-end ETL data pipeline to support a real-time dashboard for campaign performance and monitoring

USAbLe Life

Remote

IT Operations Intern

July 2024 – May 2025

- Managed internal employee transfers, hires, and terminations company-wide using onboard ITSM tools.
- Optimized automated workflows to better align with company and individual needs, employing low-code solutions.

Elliot’s Oyster House

Seattle, WA

Serving Assistant

June 2023 – September 2023

- Maintained cleanliness and organization of dining areas, including clearing and resetting tables
- Handled guest inquiries and concerns promptly and professionally, resolving issues to their satisfaction

PROJECTS

Zen Mental Health App: HTML, CSS, JavaScript

- Built an interactive web application to track and inform users on mental health using React
- Collaborated in 4 person team to implement interactive features
- Used GitHub to facilitate version control and collaboration.

COVID-19 and Political Leaning: R

- Generated interactive visualizations analyzing different aspects correlated to politics and COVID-19
- Implemented a multi-page application discussing and visualizing collected data

Food Bank Database: SQL

- Created a database containing mock food banks to analyze correlations between factors like location, population, donations, and size of donations.
- Created a set of 20+ queries to analyze the data.
- Visualized the entity relationship diagram to characterize connections between entities and their attributes
